1 Misc Problem 6.27

If P(A) = 6/11, P(B) = 5/11 and P(A + B) = 7/11 find

i. P(AB)

ii. P(A|B)

iii. P(B|A)

2 Solution

i. From

$$P(A + B) = P(A) + P(B) - P(AB)$$
 (2.0.1)

Substituting the values,

$$\frac{7}{11} = \frac{6}{11} + \frac{5}{11} - P(AB) \tag{2.0.2}$$

$$P(AB) = 1 - \frac{7}{11} = \frac{4}{11}$$
 (2.0.3)

ii.

$$P(A|B) = \frac{P(AB)}{P(B)} = \frac{4/11}{5/11} = \frac{4}{5}$$
 (2.0.4)

iii.

$$P(B|A) = \frac{P(AB)}{P(A)} = \frac{4/11}{6/11} = \frac{2}{3}$$
 (2.0.5)
